OBJECTIVE

I am a technology professional with over 10 years of experience managing projects and client-facing systems at Alight Solutions. I am now pursuing a full-time data science role to apply my analytical and machine learning skills. I recently completed my M.S. in Data Science at DePaul University, where I led a capstone project building a BERT-based classification model to automate outcome classification for the Impact Genome Project's social program registry. I am seeking to leverage my project management background and technical training to deliver actionable insights while growing my expertise in data science.

WORK EXPERIENCE

Alight Solutions

Client Technology Manager 2020 - present

- Managed all technology projects for multiple clients
- Executed acceptance testing and provided final signoff for all updates
- Responsible for managing application access and completing security audits

Client Technology Analyst 2019 - 2020

- Interpreted client requirements and completed impact analysis
- Designed test plans that were used to test Alight's benefits system

Client Technology Specialist 2014 - 2019

- Configured and tested Alight's benefits system based on client requirements
- Identified and debugged issues encountered during testing

EDUCATION

DePaul University, College of Computing and Digital Media 2021 - 2025

M.S., Data Science

- Curriculum: Data Analysis & Regression, Data Science Fundamentals, Data Visualization, Machine Learning
- Skills: Python, R, SAS, AWS, Tableau, Jupyter, and SQL

University of Notre Dame, Mendoza College of Business 2010 - 2014

B.B.A., Information Technology Management

- Curriculum: Application Development, Systems Analysis & Design, and Strategic IT
- Skills: Visual Basic and SQL

ACHIEVEMENTS

Data Science Capstone Course – Impact Genome Project 2025

- Impact Genome Project maintains a registry with the verified outcomes of social programs
- Team developed a BERT classification model to automate the categorization of those outcomes

Toastmasters International - District 30 - ALTO Club 2017 - 2018

- Elected as a club officer: VP of Public Relations and Marketing
